

More Convenient Payment Methods Improved Checkout Experience

With over 70% of parents/guardians using School Cash Online on their mobile devices, we've optimized the checkout experience to be more streamlined and mobile-friendly. And with the addition of Apple Pay and Google Pay, parents/guardians will enjoy an even faster checkout experience.

Key Benefits of Apple Pay and Google Pay

- **Convenience:** Parents can complete transactions swiftly using the digital wallet tools already stored on their devices.
- **Security:** Both Apple Pay and Google Pay use tokenization, generating unique transaction tokens to protect sensitive information and reduce the risk of data compromise.
- **Faster Checkout:** Parents no longer need to search for their physical credit cards, streamlining the process and reducing potential delays.

Availability

- **Apple Pay:** Available on iPhones, Apple Pay allows parents to use their stored credit or debit cards for secure payments.
- **Google Pay:** Available for desktop users on Google Chrome and Android mobile devices. Parents can use their saved credit cards in their Google Account for payments.

FAQs

What is Google Pay?

Google Pay is a secure payment service from Google that allows users to tap to pay online and in stores by adding a payment card to their Google Account. This service facilitates a faster checkout experience and keeps card details secure. For more information, visit [Google Pay](https://pay.google.com/about/). <https://pay.google.com/about/>

What is Apple Pay?

Apple Pay is a private, secure payment method from Apple, available for use online, in apps, and in stores. Users add their credit or debit card to the Wallet app on their iPhone to start using Apple Pay. For more information,

visit: apple pay (Canadian) <https://www.apple.com/ca/apple-pay/>
